Solomon Shmels

Date of birth: 11 Mar 2000 | **Place of birth:** Ethiopia | **Nationality:** Ethiopian | **Phone number:** (+251) 904867953 (Mobile) | **Email address:** solomonshmels@gmail.com | **Website:** https://solomon-shmels-portfolio.vercel.app | **Website:** https://github.com/Sol-Reactor | **LinkedIn:** solomon-shmels | **Address:** Mekelle, Ethiopia (Home)

ABOUT ME

Full-stack software engineer and final-year Software Engineering student at Mekelle University, working across Java/Spring Boot microservices and React/Node.js. At INSA I built features for DevHub, an internal engineering Q&A platform. I also designed and shipped OneClick, a booking and queue system now used daily by a phone repair shop in Addis Ababa. Moving toward AI engineering and open to remote or hybrid junior software engineering roles.

WORK EXPERIENCE

FULL-STACK SOFTWARE ENGINEERING INTERN – INFORMATION NETWORK SECURITY ADMINISTRATION (INSA) – Dec 2025 – Jun 2026 – ADDIS ABABA, ETHIOPIA

Built features for INSA DevHub, an internal Q&A and knowledge platform for the Software Engineering Division, used on an isolated network.

- Delivered work across a React frontend and Spring Boot microservices backed by PostgreSQL
- Integrated new services into an existing microservices architecture running in Docker containers
- Worked in a shared production codebase: service boundaries, API integration, Keycloak OAuth2/JWT auth and RabbitMQ messaging
- Stack: Java 17, Spring Boot 3, Spring Cloud (API Gateway, Eureka, OpenFeign), PostgreSQL, MongoDB, Elasticsearch, RabbitMQ, Keycloak, WebSockets, React, Tailwind CSS, React Native, Docker

EDUCATION AND TRAINING

2020 – CURRENT Mekelle, Ethiopia

BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING (EXPECTED 2027) Mekelle University

Field of study Software and applications development and analysis

PROJECTS

JUN 2026 – SEP 2026

OneClick – Phone Repair Queue and Booking System (in production)

Full-stack booking and queue management system for a phone repair shop in Bole, Addis Ababa, replacing walk-in queuing. In daily use at the shop.

- Pitched the system to the owner myself and built it end to end: frontend, backend and database
- Customers book a repair and get an appointment time and price estimate from a service catalog
- Appointment workflow (pending, in process, done, cancelled) with full status history
- Admin, technician and client roles; JWT auth in HTTP-only cookies; email and Telegram bot notifications
- Stack: React, Vite, Tailwind CSS, Node.js, Express, TypeScript, Prisma, PostgreSQL

Familia – Social Network

A Facebook-style social network built from scratch across the full stack.

- Real-time feed updates with Socket.IO on server and client
- Image uploads streamed through Multer to Cloudinary
- Express API with Prisma, Joi validation, and JWT auth with bcrypt-hashed passwords
- Stack: React, TanStack Query, Zustand, Express, Prisma, Socket.IO, Cloudinary

Haya – School Management System

Full-stack school management system built for the school I grew up attending, with dashboards for administrators, teachers, students and parents.

- Role-based access control for four roles, enforced at the API rather than only in the UI
- JWT auth with bcrypt-hashed passwords and Helmet security headers
- Express REST API with Prisma; React frontend with Redux Toolkit and five switchable themes
- Stack: React, Redux Toolkit, Node.js, Express, Prisma

MyQuiz – Quiz Platform

Full-stack quiz platform where students test themselves and track score progress, with an admin dashboard for managing quizzes.

- JWT auth with user and admin roles
- RESTful Express API with protected routes for submitting answers and reading results
- Plain SQL via the pg driver on PostgreSQL, with seed scripts
- Stack: React, Tailwind CSS, Node.js, Express, PostgreSQL

Rakeb – E-commerce Store

My first live project: an online store with a database-backed product catalog, responsive layout and switchable themes.

- React frontend with Zustand for state management
- Node.js and Express backend on PostgreSQL, deployed to Render
- API protected with Helmet security headers and Arcjet rate limiting
- Stack: React, Zustand, Tailwind CSS, DaisyUI, Node.js, Express, PostgreSQL

SKILLS

Java | Spring Boot | Microservices (Spring Cloud) | JavaScript / TypeScript | React | Node.js / Express / NestJS | PostgreSQL / MongoDB / Prisma | Docker | OAuth2 / Keycloak / JWT | RabbitMQ / Elasticsearch | Git | Tailwind CSS | REST APIs / WebSockets | React Native

LANGUAGES

Mother tongues: Amharic, Tigrinya

English: Listening C2 · Reading C1 · Writing C1 · Speaking B2
